

INSTALLATION INSTRUCTIONS

FUEL FILTER MOUNT

08-21 SUBARU IMPREZA/WRX/STI/FORESTER

05-09 SUBARU LEGACY/OUTBACK

Support: info@radiumauto.com

Document# 19-0395

WARNING: DO NOT EXPOSE WORK AREA TO ANY SPARKS OR FIRE. DO NOT SMOKE WHILE OPERATING ON THE FUEL SYSTEM. CLEAN UP ALL FUEL SPILLS IMMEDIATELY. WORK IN A WELL VENTILATED AREA.

1. As shown, this kit does NOT include a fuel filter, adapter fittings, fuel hose, etc. These can be found at www.radiumauto.com.

2. Using light oil, lubricate the O-rings on the two 10AN ORB fittings. Secure the fittings to the fuel filter ports using a non-marring wrench.

3. Find the 2-piece fuel filter mount and sheet metal bracket in the kit.

Secure the lower filter mount to the bracket as shown using a 4mm Allen wrench and 8mm wrench.

4. Center the fuel filter in the lower mount. Make sure the fuel filter outlet cap is pointing towards the small mounting hole on the bracket (or towards the engine when installed).

Using a 4mm Allen wrench, clamp the fuel filter using the upper mount and provided hardware.

5. Safely lift the vehicle.

Find the area pictured located just inside of the front left wheel.

The fuel filter bracket will be mounted to the OEM holes shown.

6. Peel the protective covering off both spots.

7. Using 14mm and 10mm wrenches, secure the fuel filter bracket to the chassis, as shown.

8. This picture is shown with hoses (not included) connected to the fuel filter.

NOTES:

1. Always position hoses away from hot and/or tight areas to prevent chaffing.
2. For LHD vehicles, pay close attention to the steering arm.

INSTALLATION COMPLETE
